

# SCRIPT FOR ASKING A BUSINESS TO SHOOT A VIDEO

(I would suggest this after you have built rapport with the business and consistency.)

Hello it's me again. I hope all is well. I was wondering, would you be interested in having me shoot a free, quick video of your business with you explaining what services and products you offer. Sometime people don't realize all the things that you can do for them. It also helps personalize your business and the experience for your customers..

It's not meant to be professional, just fun and valuable for our community. It usually about 2-3 minutes long and I can ask you questions, or you give me a few questions to ask you.. Or, we can just go with it, whatever works best for you. We will then post to the community website, Facebook and send to you to share on your websites and Facebook pages. We're glad to do it free of charge to help you out.

How does that sound?
